CS323 Compiler Project Phase 1

Group: 12110529 CAO Zhezhen, 12110804 FANG Jiawei, 12110817 ZHANG Zhanwei.

Sorted in alphabetical order.

Test Platform

Name	Value
OS	Ubuntu 22.04.2 LTS on Windows 10 x86_64
Bison	bison (GNU Bison) 3.8.2
Flex	flex 2.6.4
libbison-dev	2:3.8.2+dfsg-1build1
gcc	gcc (Ubuntu 11.4.0-1ubuntu1~22.04) 11.4.0
Make	GNU Make 4.3. Built for x86_64-pc-linux-gnu

Compile

Before: make clean

Then: make or make splc.

Basic Feature List

All implemented.

Extended Feature List

Error Detection

- Hanging else
- Invalid function definition inside functions
- Various errors about missing parenthesis/square bracket:
 Run parser on |test/test_12110804_2.sp1 | for details on missing square brackets.
- Various errors about missing operands:

• Errors about invalid constant form:

Other SPL Parser Features

• Optimized error/warning output

```
iskxcr@ISK-WKST:~/CS323-Compiler-Project$ bin/splc std-test/phase1/test_1_r04.spl
 std-test/phase1/test_1_r04.spl:9:16: error: missing closing parenthesis ')' [B]
        9 | int test_1_r04(
 std-test/phase1/test_1_r04.spl:12:48: error: missing right parenthesis ')' [B]
       12 | c = func_2(func_1(func_1(a+b*func_1(b)), 1.7);
iskxcr@ISK-WKST:~/CS323-Compiler-Project$ bin/splc std-test/phase1/test 1 r03.spl
 std-test/phase1/test_1_r03.spl:4:13: error: unknown lexeme [A]
        4 | float i = $;
 std-test/phase1/test_1_r03.spl:4:14: error: invalid initialization [B]
        4 | float i = $;
 std-test/phase1/test_1_r03.spl:6:13: error: missing semicolon ';' [B]
        6
              return 1
 std-test/phase1/test_1_r03.spl:8:10: error: unknown lexeme [A]
        8 | return @;
 std-test/phase1/test_1_r03.spl:1:5: error: invalid function body [B]
        1 | int test_1_r03()
iskxcr@ISK-WKST:~/CS323-Compiler-Project$ bin/splc test/phase1/test_12110804_4.spl
 test/phase1/test_12110804_4.spl:7:5: error: dangling else is not allowed [B]
iskxcr@ISK-WKST:~/CS323-Compiler-Project$ bin/splc test-ex/phase1/test_2.spl
 test-ex/phase1/test_2.spl:3:9: error: function definition not allowed here [B]
        3 | int foo();
iskxcr@ISK-WKST:~/CS323-Compiler-Project$ bin/splc test-ex/phase1/test_3.spl
 test-ex/phase1/test_3.spl:4:15: error: too many decimal points or exponential indicators [A]
              float y = .3e-13e7;
 test-ex/phase1/test_3.spl:6:5: error: expected expression before '>' [B]
        6 >7;
iskxcr@ISK-WKST:~/CS323-Compiler-Project$ bin/splc test-ex/phase1/test_4.spl
 test-ex/phase1/test_4.spl:14:6: error: expected expression after '/' [B]
       14 | */ // This is a dangling comment, which should not be recognized
 test-ex/phase1/test_4.spl:14:5: error: expected expression before '*' [B]
              */ // This is a dangling comment, which should not be recognized
 test-ex/phase1/test_4.spl:15:2: error: missing semicolon ';' [B]
       15 |}
```

This may cause the diff utility not to work when doing batch verifying, as ASCII control sequences are used to color the output and they will not be recognized by diff.

The output parsing tree will not get colored.

This is done by using ASCII control sequences and reusable file descriptors. **Some of the SPL grammar** structure is modified, but the target language does not change.

- StmtList and DefList now cannot be empty.
- Allowing unary operators: +/-, unary prefix/postfix operator: ++/- Run parser on test/test_5.sp1 for details.
- Allowing for loop declaration
 - Allow any type of for loop combination:

```
for ([optional definition]; [optional expression]; optional expression)
   stmt
```

Run parser on [test_ex/test_6.sp1] for details.

Allowing the following floating-point declaration, given by [0-9]*\.[0-9]+([eE][-+]?[0-9]+)?:

```
float y = .3e-13;
```

Run parser on test-ex/test_3.sp1 for details.

• Allowing single-line/cross-line comments

This is done by assigning yylex with specific states.

Run parser on test-ex/test_4.sp1 for details.

- Allow single-line/cross-line strings:
 - Allowed escape characters: \[abefnrtv\'"?]

This is done by assigning yylex with specific states.

Run parser on test-ex/test_5.sp1 for details.

There are other tests that do hybrid testing. You may check them out individually.
